Smoke - Techno Achievements

❖ Smoke Science & Product Technology

- Developed Recommended Methods*, Guides and Reports on tobacco, product and smoke analysis (chemical and physical)
 - 37 ISO standards based on CORESTA Recommended Methods (CRMs)
 - + 6 CRMs currently in the process of becoming ISO standards
 - Regular collaborative studies/proficiency trials to support member labs' accreditation (agrochemicals, TNCO, physical...)
 - Protocols for *in vitro* toxicity testing of mainstream smoke

➤ Developed Reference Materials

- CM 'CORESTA Monitor test piece' for smoking machine set-up + 1 for LIP testing
- 4 smokeless tobacco products

*62 out of 85 CRMs are currently active, due to obsolescence/replacement of older ones

Development of Recommended Methods

❖ Approach used for the development of robust methods

- Involvement of a relatively large number of laboratories
- Involvement of a wide range of product and design styles
- Round-table discussions during development provide valuable insight into causes and ways to reduce inter-laboratory variability
- Consensual and unanimous decisions on “standardisation”

❖ Conclusions & Achievements

- Methods and Reports are made available on the CORESTA website
- Experiences in method development shared within the Groups may be made publicly available in peer-review publications
